

Muhammad Ellbendl Satria

INFORMATICS UNDERGRADUATE | AI & ML ENGINEER

PROFESSIONAL SUMMARY

I am an Undergraduate Informatics Student at Pembangunan Jaya University, driven by a profound interest in artificial intelligence (AI). My academic focus centers on deep learning, machine learning, and neural networks. Outside of academics, I'm an avid gamer who finds inspiration in virtual worlds. I'm passionate about pushing the boundaries of AI technology and exploring its ethical implications in our evolving digital landscape. My goal is to contribute to meaningful innovations that shape the future of technology.

EDUCATION

Bachelor of Science in Informatics | 2023 - Present

Universitas Pembangunan Jaya, South Tangerang

- Relevant Coursework: Introduction to AI, Web-Based Programming, Introduction to Computing, Design Analysis Algorithms, Database, Object Oriented Programming, Calculus, Linear Algebra
- GPA: 3.6

PROJECTS

AlxoSphere Chat

- AlxoSphere Chat is AI chatbot (Like ChatGPT) utilizing the ReAct (Reasoning + Acting) agent framework, enabling dynamic interactions and real-time information retrieval. Integrated external tools and APIs to enhance responses, allowing the chatbot to provide up-to-date assistance across various domains. Designed for adaptive decision-making, ensuring accurate and context-aware answers.
- Project Link: <https://chat.alxosphere.studio/>

Dream Studio

- Dream Studio is an advanced AI-powered image generation tool that transforms text descriptions into high-quality images. Integrated a prompt library for enhanced user creativity and an image upscaling feature to improve resolution. Designed for seamless user experience, enabling efficient and high-fidelity image creation.
- Project Link: <https://dream.alxosphere.studio/>

AlxoSphere Echo

- Echo is an advanced text-to-speech (TTS) tool that converts text into realistic, human-like speech using cutting-edge AI models. Optimized for natural intonation, clarity, and expressiveness. Integrated multi-voice support and customizable speech parameters to enhance user experience.
- Project Link: <https://echo.alxosphere.studio/>

LSTM Stock Prediction - AI-Powered Financial Forecasting

- This is a stock price prediction model using Long Short-Term Memory (LSTM) networks, incorporating an ETL (Extract, Transform, Load) pipeline for data preprocessing. Built a Streamlit-based web application for real-time prediction, visualization, and model evaluation, providing insights into stock market trends.
- Project Link: https://github.com/DecX-x/LSTM_Stock-Prediction

License Plate Detection - Real-Time Vehicle Monitoring

- This projects is an automatic license plate detection and recognition system using YOLOv8. Implemented real-time video processing to capture, detect, and highlight license plates from webcam feeds, enabling applications in traffic monitoring, security, and automated toll systems..
- Project Link: https://github.com/DecX-x/License_Plate_Detection

Brain Tumor Detection - AI-Assisted Medical Diagnosis

- This is a deep learning-based medical imaging solution for brain tumor detection using YOLOv8. The project includes MRI image preprocessing, dataset structuring, and model training with the Ultralytics YOLOv8 framework, aiding in early diagnosis and healthcare decision-making.
- Project Link: https://github.com/DecX-x/Brain-Tumor_Detection

CERTIFICATION

Alibaba Cloud Certified Developers - 2 AI (Alibaba Cloud)

- Issued: January 2025 · Expires January 2027

AI Engineer (Scrimba)

- Issued: December 2024

Learn Python (Scrimba)

- Issued: December 2024

Muhammad Ellbendl Satria

INFORMATICS UNDERGRADUATE | AI & ML ENGINEER

Generative AI for Business Intelligence (BI) Analysts (IBM)

- Issued: December 2024

Natural Language Processing in Tensorflow (Deeplearning.AI)

- Issued: July 2024

Introduction to Generative AI (Google Cloud)

- Issued: December 2024

Machine Learning Specialization (Stanford University)

- Issued: May 2024

AI Engineering Professional Certificate

- Issued: February 2024
